

# INSULDECK

## DARWALLA MILLING

### Queensland, Australia

#### Job Requirement:

4 new poultry sheds with insulated roof and walls and ventilation flaps.

#### Project:

Darwalla Milling Laidley, Queensland Australia.

#### Product:

**INSULDECK** insulated panel system.

#### Panel Type:

**INSULDECK** 3 in 1 Insulated roofing with ZINCALUME® steel roof skin.

Darwalla Milling required 4 new poultry sheds at their plant in Laidley, Queensland. These sheds required a roofing product that offered excellent insulation qualities and an easily washable ceiling skin. These specifications made **INSULDECK** the perfect product for the job.

The **INSULDECK** 3 in 1 insulated panel systems combines the standard metal roofing profile with the insulation and the PVC ceiling skin in one easy to install application, thus reducing costs and site time for installation.

The excellent insulation qualities assisted with temperature control within the sheds as well as reducing noise. The PVC ceiling skin provided a low maintenance, easy to wash and aesthetically pleasing finish.

The standard roofing profile allows the other constructed buildings to be matched to these sheds and standard roofing materials and flashings to be used.

A great product for your next agricultural shed.
