

PANELLOCK®

WESTPAC CALL CENTRE

Brisbane, Australia

Job Requirement:

Architectural Cladding Envelope utilising **PANELLOCK®** horizontally laid panel system.

Project:

Westpac Call Centre, Brisbane Australia.

Product:

PANELLOCK® horizontally laid panel system.

Panel Type:

PANELLOCK® Horizontally laid Panel System consisting of Metallic Pre finished steel skins internal and external bonded to a 100mm Polystyrene Core

Panel Tech Industries was chosen to supply and install the external cladding envelope for the new Westpac call centre in Brisbane. The **PANELLOCK®** horizontally laid Wall Panels were chosen for the clean lines offered by the unique Mini-rib profile, the superior insulating qualities of insulated panels and the visual impact of the Silver Metallic surface finish.

The **PANELLOCK®** Architectural Cladding Panels offer significant savings in energy requirements and create a comfortable environment for the many people operating the call centre.

Contact our qualified estimating team to discuss any projects that could benefit from the **PANELLOCK®** Architectural Cladding system.
